Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Friday 29 Jan 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy, with rain or drizzle gradually easing. Turning cold overnight.

Today:
A dull and damp start, with outbreaks of rain or drizzle, perhaps persistent across the hills. These easing with some drier intervals developing, but staying rather cloudy. Any lingering rain likely turning wintry across higher hills by the evening. Maximum temperature 5 deg C (41 deg F).

Tonight:
Cold overnight, with a few wintry showers possible. Otherwise clearing skies will lead to the risk of icy patches developing, along with a widespread frost and some freezing fog patches. Minimum temperature -2 deg C (28 deg F).

Saturday:
A cold and crisp start, although any freezing fog patches will be slow to clear. Sunny spells following, along with isolated wintry showers. Staying cold, with a brisk breeze developing. Maximum temperature 4 deg C (39 deg F).

Outlook for Sunday to Tuesday:
Cold, frosty start Sunday, then dry with cloud thickening. Cold, frosty start Monday, then cloudy with isolated wintry showers. Windy, with snow possible Tuesday, but likely turning to rain later.
